# What is ITICS?

The Indxx Thematic Industry Classification system (ITICS) offers a highly accurate and detailed categorization of the global equity market by classifying companies based on their operating segments and revenue streams.

ITICS incorporates both sectoral and thematic mappings, allowing for single and multiple classifications based on a company's diverse revenue streams.

## ITICS STORY

The Indxx Thematic Industry Classification system (ITICS) offers a highly accurate and detailed categorization of the global equity market by classifying companies based on their operating segments and revenue streams.

## THE ITICS EDGE

**Robust, Comprehensive and Industry-Aligned:** Through a thorough examination of macroeconomic trends, industry-specific developments, and revenue-generating sources, ITICS has identified the most promising sub-categories, categories and sectors for classification within the global equity universe

**In-Depth Due Diligence:** ITICS employs a robust methodology to classify companies within the global equity coverage universe, utilizing the most pertinent sources of information, such as annual and quarterly reports, press releases, analyst reports

**Dynamic Framework:** Company ITICS data is continuously reviewed to incorporate new information. The ITICS framework levels are reviewed annually, and any new levels are promptly added to the database, ensuring it remains current and aligned with market trends.

**Excellence Assured:** A dedicated research team uses rigorous verification and multiple quality checks to ensure the accuracy and reliability of ITICS's thematic research, making it a trusted source of information.

		Passenger and Defence Aircraft
		Ships & Boats and Parts Manufacturers/Retail

## ITICS ADVANTAGE

ITICS provides valuable insights into a company's business and operations that can be leveraged by a variety of industry participants. Potential use causes include:

### Asset Management Companies:

To construct investment funds and conduct comparative analysis between industries worldwide.

### Index Providers:

To construct sector indexes for passive investing, and for index sector weightings and index attribution analysis.

### Investment Research Firms:

To classify and analyze companies based on their nature of business for investment purposes.

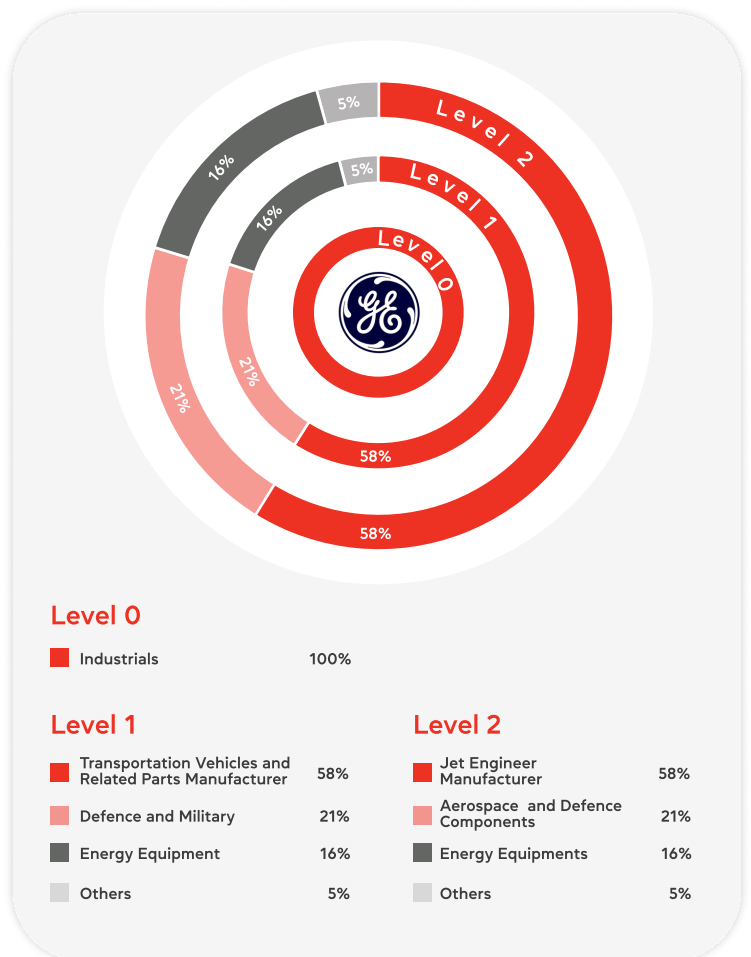

### Analyst and economists:

To follow market trends, conduct deep sector analysis, and make historical comparisons.

### Business Intelligence and Market Research Firms:

To classify and segment the market for industry-specific research and analysis
